**Invitation to a seminar in Lund, School of Architecture  
in the Formas research project Architecture in the Making:  
Architecture as a Making Discipline and Material Practice**

## ***Design in Architectural Alteration*** **5-6 December**

Welcome to a seminar in architectural conservation about the design in use and development of built environment in alteration. A task for architects is to conserve and transform the existing architecture for coming generations and future sustainability.

- *Is there a new paradigm in alteration which involves architectural design as an important part of conservation?*
- *How can we combine conservation with modernization and democratic use?*
- *What is the creative process in alteration?*

Room A:4057 (4<sup>th</sup> floor in the School of Architecture, Sölvegatan 24, Lund)  
Programme:

Monday 5<sup>th</sup> December:

- |             |  |
